Your Smile Is Valuable — **and So Is Your Time!**

I understand, and that's why I'm proud to offer single-appointment dentistry to my patients.

Get the best in superior restorations, delivered in just one appointment. No temporaries, no weeks of waiting, no follow-up visits to the office. Enjoy the same lab-quality treatment you've received all along — in a timeframe that lets you get on with your life.

When I create your single-visit crowns, I rely upon the exceptional products and services provided by Glidewell Dental, the largest dental laboratory in the world. Your restoration is created using the same time-tested processes and equipment used by Glidewell themselves, including cutting-edge design technology built with advanced AI algorithms to ensure your crown has the perfect look and feel. Glidewell has been delivering successful outcomes to patients like you for nearly 50 years, and the restoration I provide to you builds on that legacy. You're going to love the results.

Great Results in a Single Visit

- Replace existing large fillings

BEFORE

AFTER

- Restore broken teeth

BEFORE

AFTER

- Remove the metal from your mouth

Same-visit restorations are covered by most insurance policies. **Ask for more details!**

Same-Visit Crowns:

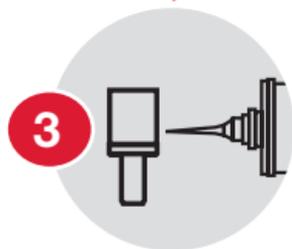

How It Works

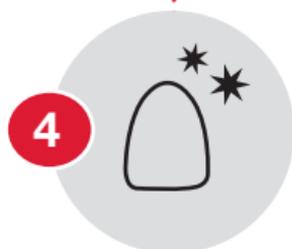

Your dentist prepares your tooth and captures a 3D digital scan of your mouth

Specialized software is used to create a digital blueprint of your dental crown

While you wait, your crown is sculpted from a block of tooth-colored, metal-free material

Your dentist bonds your custom-made crown onto your tooth
