Before

After

This patient presented with failing direct composite restorations on teeth #30 and #31. A CAMouflage® NOW A1 overlay on tooth #30 and MOBL onlay on tooth #31, provided a minimally invasive single-visit solution.

“CAMouflage NOW is an excellent restorative alternative for indirect dentistry. I can provide high-quality conservative restorations to my patients in a matter of minutes. This, in turn, has increased the productivity of my practice.”

– Chad Duplantis, DDS | Fort Worth, TX

BENEFITS

- Shade stability long after delivery
- Rapid patient delivery with no oven wait
- Choose from a wide range of lifelike shades that blend well with existing dentition

“All ceramic-polymer products in this study (except CAMouflage® NOW) had high cementation failure at one year of clinical service, and those numbers increased over time.”

*An independent, non-profit, dental education and product testing foundation, Clinicians Report®, Nov. 1, 2018. For the full report, go to glidewell dental.com/camnow-report

READY TO DELIVER IN UNDER 10 MINUTES

SPECIFICATIONS

MATERIAL

- Approximately 80% ceramic-filled nanohybrid resin composite
- Flexural strength: 193 MPa

IDEAL FOR

- Single-unit anterior and posterior crowns
- Inlays and onlays

SHADES

- 7 VITA® Classical Shades, 5 in 2 translucencies: A1HT/LT, A2HT/LT, A3HT/LT, A3.5HT/LT, B1HT/LT, C2LT, D2LT
- 1 VITA Bleach Shade: BLLT

EASY PREPARATION

ONLY

- Prepare cavity walls tapered 5–6° to the long axis.
- Wall thickness should be ≥ 1.5 mm.
- Isthmus thickness should be ≥ 1.5 mm.

**Milling times vary based on prescription and mill used. Average milling time is shown. VITA is a registered trademark of VITA Zahnfabrik.
