

## EFFORTLESSLY MILL THE CROWNS YOU WANT, WHEN YOU WANT:

- **Mill fully sintered BruxZir® crowns and bridges** with no oven time required — just polish and cement, and you're done.
- **Let MarginAI™ and CrownAI™ do the design work for you** so you can spend your time with your patients.
- **You're connected directly to Glidewell** for training and support at any time.
- Love your scanner? Great! — **glidewell.io is an open system and works with your preferred scanning system.**

## WHAT YOUR PEERS ARE SAYING ABOUT GLIDEWELL.IO™:

“

*For me, the number one selling point of the glidewell.io™ In-Office Solution is the support. With the technicians readily available to contact if needed, it's like having the best mentor available. **As soon as we got it, we had the confidence to start milling right away and milling big cases right away.** I have no regrets. The only question I'm wrestling with now is when to get my second mill.*”

– Dr. Isaac Day | Alberta, CAN

“

*My team and I used a CEREC® in-office system for a few years and found the software cumbersome and not very intelligent. The glidewell.io™ system and its incorporated software are AMAZING! Scanning the patient and designing the restoration are easy to learn. The blocks **mill quickly and come out of the mill basically polished and ready to go** — CEREC could never match that!*”

– Dr. Robert Rutner | South Lake Tahoe, CA

“

*I had another milling unit in my office for eight and a half years prior to switching to glidewell.io™, and the learning curve I fought through with the other system was tough. What Glidewell has done with the software is amazing! **Glidewell has essentially eliminated the learning curve with automated crown designs using AI.** I could not be more impressed, and I'm looking forward to what is coming in the future.*”

– Dr. Christopher Petrush | Pleasant Hill, CA
